Dallas, TX (open to relocation) | 817-937-0970 | bhavinjagani2001@gmail.com | open to relocation | [linkedin.com/in/bhavin-jagani](https://www.linkedin.com/in/bhavin-jagani) | github.com/bhavinjagani

SUMMARY

Full Stack Developer with experience building React and TypeScript applications, integrating REST and GraphQL APIs, and working across Node.js, SQL, and AWS-backed systems. Built reusable UI components, improved frontend performance, and delivered production features end to end across ERP, e-commerce, and platform workflows. Comfortable translating operational requirements into reliable software with a focus on maintainability and user experience.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3

Backend: Node.js, Express.js, GraphQL APIs (Apollo), RESTful API design, OAuth, JWT, WebSockets, SSO, SAML

Databases: PostgreSQL, MySQL, MongoDB

Frontend: React.js, Next.js, Radix, Redux, Zustand, React Query, Tailwind CSS

DevOps & Tools: Git, GitHub, Docker, CI/CD, GitHub Actions, AWS (EC2, S3, Lambda, RDS, IAM), Nginx, Jest, Agile/Scrum

AI Development: Claude Code, Cursor, LLM API integration (Anthropic, OpenAI, Gemini), prompt engineering

EXPERIENCE

FabLab

Aug 2025 - May 2026

Full Stack Developer

Arlington, TX, USA

- Led development of FabApp, a scalable React, TypeScript, and Node.js platform serving 15,000+ monthly users, owning features end-to-end from architecture and PostgreSQL schema design through testing and production deployment.
- Translated messy real-world operational rules - equipment access, certifications, scheduling constraints - into maintainable, production-grade services; built reservation logic that resolves complex rule interactions correctly during peak usage
- Automated data migration, reporting, and equipment-usage analysis workflows using Python scripts, reducing manual administrative effort and improving data accuracy across 15,000+ user records
- Refactored shared UI elements into a reusable React component library, reducing code duplication and keeping interaction patterns consistent across platform modules
- Implemented SSO with Azure AD and SAML, designed JWT authentication strategies for token-based sessions, and enforced role-based access control for secure, granular user access.

GIR Software Services - Remote

May 2022 - Jul 2024

Web Developer

Houston, TX, USA

- Built and customized Oracle NetSuite ERP billing workflows - pre-order, back-order, and order fulfillment logic - directly relevant to usage-based billing, invoicing, and order-state accuracy
- Engineered pre-order and back-order inventory management with real-time stock visibility - translating complex business logic (stock states, order priority rules) into reliable production code
- Improved React frontend performance through code splitting, lazy loading, and bundle optimization, reducing page load time by ~40% and raising the Lighthouse score from 68 to 92.
- Integrated Google Tag Manager with custom event tracking across 10+ trigger points (PLP views, PDP visits, add-to-wishlist), firing to Google Analytics for granular funnel visibility
- Developed a responsive, multi-step Gift Box Builder with reusable React and TypeScript components, attracting 500+ monthly active users and increasing personalized gifting interactions by 30%.

WiseDV Electronics India Pvt. Ltd

Dec 2021 - Mar 2022

Web Developer Intern

Gujarat, India

- Built dynamic form builder frontend using Angular and RESTful Node.js APIs, handling 1,500+ monthly form submissions backed by MySQL
- Developed RESTful APIs using Node.js for seamless frontend-backend data interaction, improving operational efficiency.

PROJECTS

Buynsale Buynsale

- Architected and self-hosted a full-stack marketplace for pre-owned products using an Apollo GraphQL API, React frontend, PostgreSQL database, and secure JWT-based authentication
- Shipped an LLM-powered feature in production: Gemini API integration generating listing descriptions, with prompt design, output validation, and fallback handling for model failures
- Built hybrid semantic search and a grounded RAG assistant over a [N]-listing marketplace catalog, combining dense Gemini embeddings and sparse term vectors in Qdrant through reciprocal rank fusion and serving results through the existing GraphQL API

EDUCATION

University of Texas at Arlington

Aug 2024 - May 2026

Master of Science, Computer Science

Arlington, TX

- GPA: 3.7/4.0

Charotar University of Science and Technology

Jun 2018 - May 2022

Bachelor of Technology, Computer Engineering

Gujarat, India

- GPA: 8.33/10.0
